Email

The Email Add-On is an E-mail program with easy to operate basic functions, with which E-mails can be sent through a mail server configured in the Add-On. CC addresses can be assigned, attachments can also be sent.

In addition, the Add-On has an address book in which addresses can be stored, edited and deleted, and entries in the address book can be selected directly as recipient or CC address.

This Add-On also has a function to define alarm mails that are sent as soon as the corresponding class server for the alarm has been set within the program.

This Add-On contains the program elements for the LASAL CLASS project, as well as the LASAL SCREEN projects for multiple resolutions.

FEATURES

- Mail server configuration
- Common mail functions include fill attachment
- Simple address book
- Alarm mail function
