

DIAS Drive

MDD 2000

The DIAS-Drive 2000 series contains the power/axis modules and axis modules for a power input voltage of 400/480 V AC. The system is currently available in 2 different sizes.

In the power/axis modules (MDP), as well as the axis modules (MDD), up to 3 servo amplifiers are integrated. With a power/axis module, several axis modules can be powered.

The DIAS-Drive 2000 is a complete servo drive system for the low to mid power range, which can also be used for applications high control performance. It is completely integrated into the LASAL design environment.
