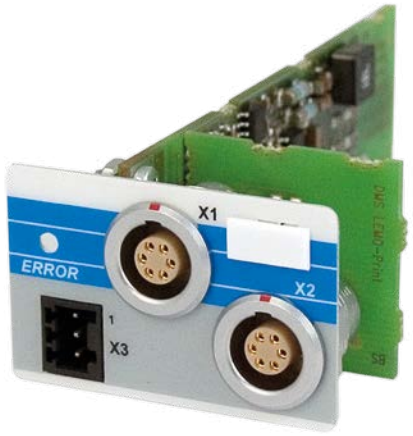
DMS Insert Module
MSR 282



This input module is used to measure the expanding or compression of strain gauges with a Wheatstone bridge. The module has two channels, each with a short-circuit proof excitation voltage of 3.333 V. The measurement range of the Wheatstone bridge is 10 mV/V. Other measuring ranges starting from 1.5 mV/V are available on request. The strain gauges can be connected with 4 or 6-wire technology. Drift correction (zeroing) is possible.

The processed input signals can be measured over the diagnostic connector. The signals on the diagnostic connector are for diagnostic purposes only and cannot be calibrated.
