

LVD Chart

The LVD Chart enables the graphical representation of data provided via LASAL CLASS 2 or via code module. The component can display this data in various chart forms - line, bar, pie, etc. - and make it available for analysis.

FEATURES

- Display of stationary data
- Multiple display types: Line, spline (a smoothed line), step, bar, pie and donut
- Navigation in larger diagrams using the overview area below the diagram

FACTS

Development environment	LASAL CLASS 2, LASAL VISUDesigner
